

## **OASTON ENGINEERING LTD**

### **QUALITY POLICY:**

Oaston Engineering Ltd manufacture precision engineered components for such markets as Surface Science, Analytical Instruments, Construction and Motorsport Industries.

Products are manufactured to customer drawings, requirements and specifications using CNC and conventional machining processes

The Oaston Engineering Ltd Quality Policy is that our established requirements for high standards of Quality, whether of product, service, process or personnel, are readily recognized by everyone associated with us.

We are therefore committed to ensuring that measures are in place to prevent risk to the company whilst ensuring that the product of our work achieves a standard which complies with both contractual and legislative requirements and is appropriate to the purpose and context of the organization.

The Company recognizes that the maintenance and continual improvement of company processes and standards in our work is the keystone to our success, our reputation, our future and to the professional satisfaction of customer's colleagues and our community.

To realise this aim, we have developed a Quality Management System which meets these needs and the requirements of ISO 9001 which we review regularly for continuing conformance, stability and improvement.

It is the responsibility of top management to set and review specific measurable quality objectives for the business, and to provide sufficient time and resource to achieve these, and for all company staff to understand, conform and contribute to the requirements of this philosophy and its associated working practices and procedures.
